

Lab 4 – Part 2: Machine Learning Application

For this part of the lab:

1. Add the files to a new branch in your repository (Make sure that all the files and folders are correctly added and structured).
2. Solve the tasks in the Jupyter Notebook.
3. Once they are solved and all the questions answered (*note that there are interpretations to be made*), extract the code from the jupyter notebook and add it to your folder in src and main.py.
4. Your interpretation should be displayed in the README.md.
5. Commit your edits.

Note that this part of the lab was the assignment from the last semester. As for you, it will 20% of the assignment grade.
